A General Price List  
for the Trade Exclusively

1924-1925

*WE take a great pride in presenting to the trade our first general price list, which we have tried to make as comprehensive and as complete as possible, and we feel assured that our fellow nurserymen will appreciate the great effort we have made in collecting and selecting this great quantity of plants in so short a time.*

*Our Nursery has been established but two years on new ground south of Los Angeles, comprising 250 acres entirely devoted to the growing of ornamental stock for wholesale distribution. Being far away from the nursery district, it gives our customers a feeling of security regarding plant pests and diseases.*

*We invite a close inspection of our growing grounds, as well as our business methods.*

FRANK VIAND  
*Superintendent*

## Our Business Ethics

**PRICES** as quoted are F.O.B. Compton, Calif., and will prevail until further notice. Special prices on larger quantities than mentioned will be made on application.

**TERMS** are 30 days net to parties who furnish satisfactory references. To all others 25% must accompany order, the balance C.O.D. We will reserve stock for later delivery upon a deposit of 25%.

**CAUTION.** We accept all orders upon condition that they shall be void should our stock be exhausted or damaged by any cause over which we have no control.

**SHIPMENT** travels at the risk and expense of the purchaser. We recommend to our customers to indicate the mode of transportation they prefer; otherwise we will use our best judgment without being in any way held responsible.

**GUARANTY.** We will exercise every possible care in sending out only the best we have and we guaranty to the best of our knowledge that our plants are true to name (Reference to the book of Standardized Plant Names). Furthermore we take the utmost care in keeping our plants free from pest and disease.

**CLAIMS.** No claims will be entertained unless proper proof of our negligence can be satisfactorily furnished. Such claims should be made within five days after arrival of plants; however it is mutually understood between the purchaser and ourselves that no claims will be considered in excess of the price charged for the plants that are not up to our guaranty.

**PACKING.** We take every possible care in packing to assure our plants a satisfactory arrival; no charge will be made for packing lining out stock of 2 $\frac{1}{4}$  in. pots; for all other plants it will be made at cost.

**CONTRACT.** We are equipped to grow ornamental evergreen or deciduous on contract, no matter the quantity.

**SIZES.** We recommend for lining out, plants out of 2 $\frac{1}{4}$  in. pots, which are about 3 in. and up, according to variety; plants in 4 in. pots from 12 to 24 in., 1 gal. can from 18 to 36 in., 5 gal. cans about 3 feet and up. Field grown plants size and prices upon request.

**NOTICE.** S.—means seedling. C.—cutting. B.—budded. G.—grafted.

**IMPORTANT.** Keep this price list as reference, and order from it at any time. We will always have on hand a large quantity of the plants listed in any size for immediate shipment.

---

P.S.—Our Rose list, containing all the leading varieties, will be ready in September of every year.
